Plastic kitchen Containers

Non-refrigerated storage containers

This type of container is used to store food that does not need to be refrigerated. Sadtaplast Trading Company uses the best BPA-free raw materials in order to ensure the highest quality. These containers are produced in different dimensions and volumes, according to different customer tastes and needs, and they are in beautiful and unique colors and designs.

Plastic Freezer Containers

These containers are used for storing food for a long time and give your freezer a great storage layout. Sadtaplast freezer boxes have a silicone strip that prevents air exchange, thus preventing aerobic bacteria from entering the container. These containers can withstand temperatures of -20 to +20; therefore, they are suitable for refrigerator, freezer and microwave environments.
